DYNAMIC RIGGING HIRE

Australia's best range of quality heavy rigging gear

Water Load Bags

Unique **SEAFLEX**

A Unique Maritime Group Company

Dynamic Rigging Hire have available for hire a large range of the Seaflex™ Water load bags, Seaflex are leaders in water ballast bags with the full range designed, manufactured, tested and certified in 100% compliance with LEEA 051 guidelines. Seaflex water load bags comply with the 6:1 drop test and the only water load bags to achieve this safety factor.

Whether it be one single 1,000kg bag load testing a small davit arm or hoist right through to a large overhead bridge crane, crawler or mobile crane Dynamic Rigging Hire has more than 500 tonnes of water load bag capacity on hand from our Melbourne facility. We can supply a company representative to look after the on site logistics at any site on the eastern seaboard.

Water load bags have the unique advantage over solid steel or concrete weights in that their packed weight and size make the transport to and from site very easy, for example to conduct a 132 tonne test all equipment to test the crane only took half a semi trailer and needing only a standard forklift at either end.

Water load bags are the preferred load test weight for offshore platforms due to their ability to get on the platform by tender vessel or in the case of the smaller bags they pack small enough to load in a helicopter.

We also hold fire hose adaptors, lengths of fire hose, gate valves and of course calibrated load cells.
