

JDN AIR HOISTS

Dynamic Rigging Hire stock exclusively J.D Neuhaus Profi pneumatic chain hoists for hire. JDN air hoists are the market leaders with the most durable and robust hoists designed to operate in extreme conditions.

Dynamic Rigging Hire hold the hoist blocks, load chain and hooks all separated in storage and we build each and every hoist to suit the customers needs.

We hold numerous cut lengths of load chain so we can offer single falls to 100m drops, the load chain is calibrated Thiele chain specifically designed for use in powered hoists.

Hoists are thoroughly stripped down and inspected on return with some standard components like filters replaced after every hire.

We regularly place our JDN air hoists on offshore platforms in Bass Strait, they're used in lift shaft work in high rise construction, underground mines and all manner of general hoisting applications.

Air service regulator/filter units are available as is any type of ancillary rigging gear to accompany the air hoists.

A certificate of test is issued with all air hoists with user notes.

WLL	Model	Chain fall options	Chain kg per/m	Air cons.	Controls	Chain bucket
500kg	.5Ti	8, 15, 20, 30, 50, 100m	1	53cfm	Cord	Yes
1,000kg	1Ti	8, 15, 20, 30, 50, 100m	1	53cfm	Cord	Yes
2,000kg	2Ti	4, 7, 10, 15, 25, 50m	1	53cfm	Cord	Yes
3,000kg	3Ti	8, 15, 30, 65, 100m	3.8	195cfm	Cord	Yes
6,000kg	6Ti	4, 7, 15, 30, 50m	3.8	195cfm	Cord	Yes
10,000kg	10Ti	3, 4, 15m	5.8	195cfm	Cord	Yes *4m max
12,500kg	10Ti	3, 4, 15m	5.8	195cfm	Pendent	No
16,000kg	16Ti	10m	5.8	195cfm	Pendent	No

Standard features

100% duty cycle
 Sensitive and variable speed control
 Oil free operation (self lubricating)

Failsafe brake
 Suitable for underground mining
 Ex Classification

**Australia's Best
 Range of Quality
 Heavy Rigging Gear**
