

ROUND SLINGS

Round slings being one of the most widely used rigging components provide a good option to other forms of lifting slings due to their lower weight and ease of use. We hold a large selection of Australian made round slings from United Sling Co. and Spanset.

Available with most of our round slings are Velcro covers to prevent wear to the bearing points. Round slings are subject to quarterly inspections and we maintain the RGBY tagging system.

Our round slings are all stored in large plastic crates that keep the slings clean and dry.

Also available are sling saver shackles, link plates and high capacity masterlinks where slings need to be joined for longer length legs.
