

Steel test weights

Dynamic Rigging Hire stock steel calibrated test weights in many sizes to suit all types of load testing and dead weight applications.

Load testing bridge cranes, gantries, bespoke lifting devices, lifts and hoists can all be safely achieved using our steel weights.

We can also cater for your full rigging gear requirements and can also provide calibrated load cells to verify your load tests.

Our range of steel weights include:

- 500kg
- 750kg
- 1,000kg
- 2,000kg
- 4,250kg
- And we have a 35t capacity test weight tray

All weights are stamped and have annual NDT testing to the lifting points.
